

KypherBox

Maximize employee productivity and mobility with KypherBox

We live in a fast-paced, mobile world. How are you protecting your sensitive data?

File sync technology has made it possible for employees to access and share files from virtually anywhere. Unfortunately, the use of consumer-grade file sync services, such as Dropbox, Microsoft OneDrive, and Google Drive, jeopardizes corporate data. The cost to organizations that mishandle data varies depending on the industry – but in all cases it is significant.

The benefits of file sync technology are great, but consumer-grade file sync services are not appropriate for the workplace. Therefore, it is imperative that organizations adopt a business-grade file sync solution that is both easy to use and secure.

KypherBox syncs corporate data, allowing users to access and share critical files and folders from their computers and mobile devices. With KypherBox, users are able to work from virtually anywhere.

KypherBox is full of features that make it easy for users to securely share and work with others. Users have various options for sharing with internal and external parties, can control the files and folders that they have shared, and set policies for the ways in which they are accessed. All of this combines to form an intuitive and seamless user experience.

Finally, KypherBox gives administrators total control over their corporate data. A comprehensive dashboard, rich reporting, and granular controls makes it easy to manage an entire instance of KypherBox. Coupled with military-grade encryption, custom or unlimited retention, remote wipes, continuous backups, and rapid restores, KypherBox sets the standard for business-grade file sync.

KEY FEATURES

- > Business-grade, HIPAA Compliant file sync, enabling secure file access from any device
- > Secure and easy sharing, empowering user collaboration
- > Backup and restore features, preventing data loss
- > Administrative features and integrations, delivering security and control
- > Military-grade encryption, exceeding industry standards
