The KypherMail Business Email Compliance Package provides next generation security to protect business email with advanced URL and Attachment Defense and Data Loss Prevention capabilities, as well as, comprehensive email Continuity features to keep business communications up and running at all times.

Multi Layered Anti-virus Scanning

The KypherMail advanced threat detection technology enables our anti-virus engines to provide clients with an unrivalled protection from viruses and other email-borne threats. All messages are meticulously scanned by our sophisticated virus engines, operating at the highest levels of accuracy, performance and effectiveness ensuring all known viruses are captured and blocked. For increased protection, KypherMail additionally employs heuristics scanning technology to discover email threats currently unknown to the system and protects against these in real time.

Advanced Threat Protection Technology

KypherMail leverages the advanced power of Targeted Attack Protection, Kypher's Industry Leading email analysis solution, to provide small to mid-sized businesses with URL Defense and Attachment Defense, the only service that effectively detects, catches and analyzes malicious URLs and attachments targeting this market.

Data Loss Prevention and Content Filtering

KypherMail eliminates the risk inherent in individuals making security and disclosure policy decisions by implementing a user-transparent, centrally based, policy-driven data loss prevention filter. Users simply send email, and the appropriate action is automatically taken. The solution also offers a powerful, customizable rules engine. This facilitates both content and event-based email management whitelist providing highly sensitive levels of control regarding email traffic. The service allows users to control where messages are sent to and how they should be filtered depending on specified rules with full visibility and control of features.

DATASHEET | KypherMail

Kypher Machine Learning Technology

Powered by Proofpoint MLX technology, KypherMail spam and phishing detection offers maximum protection against email threats. It examines hundreds of thousands of attributes in every email to accurately detect text, image and attachment-based spam or phishing emails, while automatically adapting to new threats as they appear. Proofpoint MLX Technology delivers the industry's highest level of effectiveness at 99% against all types of spam email, using the latest advances in reputation and content-based analysis.

Never Miss an Email with KypherMail Continuity

Smaller organizations rely heavily on email to do business but cannot justify the cost of building a highly redundant messaging infrastructure. A few minutes without email may be manageable but what about a few hours or a few days? Keeping business email running as normal even when disaster hits is crucial to the smaller enterprise. KypherMail continuity features make this possible with the emergency inbox, instant replay of lost or deleted emails over the last 30 days and email spooling.
